## DETAILED ACTION

### Election/Restrictions

1. In 12/4/2006, applicant elected to prosecute Species 6 that associated with figure 10, claims 1-20.

The requirement is deemed proper and is therefore made **Final**.

### *Double Patenting*

2. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claim 1 is rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claim 1 of U.S. Patent No. 6,872,212. Although the conflicting claims are not identical, they are not patentably distinct from each other because they recite the same subject matters as following: placing a vacuum extraction device or a vacuum extraction cup on a fetus head, recording a vacuum pressure in the pressure area.

### *Claim Rejections - 35 USC § 112*

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

3. Claims 1-20 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 1 is not clear from the specification how it is done by counting an amount of time a cup pressure is within a predetermined percentage range of the maximum pressure. Further, it is unclear what “a predetermined percentage range of the maximum pressure detected” is.

Claim 20 is not clear from the specification how the computer program generates a variable for each monitored factor, such as a pull counting variable, a pop off counting variable, a first attachment duration variable, a maximum pressure variable, a near maximum pressure variable and a pressure over time variable. Further, it is unclear what are the function of these variables has to do with monitoring and recording factors in a vacuum based fetal extraction.

Clarification is requested.
